

**MASTER  
STEWARDSHIP AGREEMENT  
Between The  
State of Montana Department of Natural Resources and Conservation  
And the  
USDA FOREST SERVICE, Northern Region**

This Master Stewardship Agreement is hereby made and entered into by and between the State of Montana Department of Natural Resources and Conservation, hereinafter referred to as “DNRC,” and the USDA Forest Service, Northern Region, hereinafter referred to the “U.S. Forest Service,” under the provisions of the Consolidated Appropriated Resolution, 2003, Public Law 108-7, sec 323, amending Public Law 105-277, sec. 327 (Stewardship Authority).

**Background:** In 2003 Congress authorized the U.S. Forest Service and the Bureau of Land Management to enter into stewardship contracts and agreements “to achieve land management goals for the national forests that meet local and rural community needs.” The primary focus of this legislation is to achieve land management goals through stewardship projects awarded under contracts or agreements. Unique to the legislation is the ability to exchange goods for services that meet the land management objectives.

The area addressed in this Master Stewardship Agreement is known as the Northern Region. The project areas will be identified in the Supplemental Project Agreements (SPAs) and will lie within the National Forests of the Northern Region within the borders of the State of Montana. Each project area will include an un-estimated number of acres to be treated during the term of this Master Stewardship Agreement.

**I. PURPOSE:**

The purpose of this Master Stewardship Agreement is to document the cooperative effort between the parties for landscape restoration activities with the National Forests within the State of Montana in accordance with the following provisions and the hereby incorporated Template for Stewardship Supplemental Project Agreement (SPA), attached as Exhibit A.

**II. STATEMENT OF MUTUAL BENEFIT AND INTERESTS:**

The U.S. Forest Service is a land management agency dedicated to the wise use and management of National Forest System (NFS) lands, including the responsibility for maintaining and improving resource conditions.

The DNRC is a land management agency that operates similarly to the U. S. Forest Service. The mission of the DNRC is to sustainably manage Montana forests, rural lands, and communities through direct and cooperative wildland fire protection, sound forest management practices, and by promoting a viable forest and wood products industry.

The stewardship projects accomplished under this Master Stewardship Agreement may include, but are not limited to: commercial and non-commercial thinning of forest stands to meet a variety of objectives, such as, hazardous fuel treatments, forest stand health improvements, and habitat enhancement. In addition, stewardship projects that are non-timber related such as noxious weed control, hand slashing and piling for fuel reduction, water quality improvements such as road maintenance and improvements, culvert replacements, and stream restoration will also be accomplished.

This Master Stewardship Agreement will provide an opportunity for the parties to seek funding to expand partnership opportunities, and to garner new and additional support from partners, including but not limited to the timber industry, federal and non-federal entities, tribal entities, and DNRC's member and volunteers. Mission accomplishment for both parties will be furthered by the restoration of natural resources across the landscape.

All projects conceived under this Master Stewardship Agreement will undergo a collaborative process to determine specific habitat improvements. The collaborative process will ensure that the benefits of undertaking restoration activities are mutually beneficial to DNRC and the U.S. Forest Service as well as being beneficial to a wide diversity of interests involved in collaboration.

Both parties share an interest in improving the ecosystem condition and function of the landscape. A healthy landscape provides a variety of benefits beyond the needs of a single species, and therefore benefits both parties.

It is therefore mutually beneficial for the parties to work together to implement landscape restoration and enhancement projects.

In consideration of the above premises, the parties agree as follows:

### **III. THE PARTNER SHALL:**

- A. LEGAL AUTHORITY. DNRC has the legal authority to enter into this Master Stewardship Agreement, and the institutional, managerial, and financial capability to ensure proper planning, management, and completion of the project, which includes funds sufficient to pay the non-Federal share of project costs, when applicable.

- B. Perform in accordance with any mutually approved Supplemental Project agreements tiered to this Master Stewardship Agreement.
- C. Explore any opportunities for additional support from other parties for projects associated with this Master Stewardship Agreement.
- D. Provide any necessary training and supervision to additional partners in C. above.
- E. Fully collaborate with the U.S. Forest Service in identifying and selecting future stewardship restoration projects in the project area.

**IV. THE U.S. FOREST SERVICE SHALL:**

- A. Have the Regional Forester or authorized designee approve all stewardship project proposals.
- B. Complete all necessary National Environmental Policy Act (NEPA) requirements.
- C. Inform DNRC of any changes in stewardship policy, law and regulations.
- D. Recognize DNRC's contribution, in a manner acceptable to both parties, in news releases, interpretive signs, photographs, or other media as appropriate.
